Two Rather Distant Topics

I'll talk about two very different topics:

Norm Matloff University of California at Davis

Central Iowa R User Group

Two Rather Distant Topics

▲ロト ▲帰ト ▲ヨト ▲ヨト 三日 - の々ぐ

I'll talk about two very different topics:

• Introduction to my R package **regtools**, especially in terms of regression diagnostics.

Norm Matloff University of California at Davis

Central Iowa R User Group

Two Rather Distant Topics

I'll talk about two very different topics:

- Introduction to my R package **regtools**, especially in terms of regression diagnostics.
- Comments on the dramatic recent ASA announcement regarding p-values.

regtools and the Mystery of P-Values Norm Matloff University of

The R Package

California at Davis

Central Iowa R User Group R package for regression and classification.

- On my GitHub site, https://github.com/matloff
- "Various tools for linear, nonlinear and nonparametric regression."

regtools

▲ロト ▲帰ト ▲ヨト ▲ヨト 三日 - の々ぐ

Norm Matloff University of California at Davis

The R Package

regtools and the Mystery of P-Values

Central Iowa R User Group R package for regression and classification.

- On my GitHub site, https://github.com/matloff
- "Various tools for linear, nonlinear and nonparametric regression."
- Meant to accompany my forthcoming book, From Linear Models to Machine Learning: Regression and Classification, with R Examples.

regtools

▲ロト ▲帰ト ▲ヨト ▲ヨト 三日 - の々ぐ

Norm Matloff University of California at Davis

The R Package

regtools and the Mystery of P-Values

Central Iowa R User Group R package for regression and classification.

- On my GitHub site, https://github.com/matloff
- "Various tools for linear, nonlinear and nonparametric regression."
- Meant to accompany my forthcoming book, From Linear Models to Machine Learning: Regression and Classification, with R Examples.
- In many senses, both the package and the book *take a* very nontraditional point of view.

The R Package regtools and the Mystery of P-Values

Norm Matloff University of California at Davis

Central Iowa R User Group

50% rough draft at

http://heather.cs.ucdavis.edu/draftregclass.pdf.

- Inference procedures based on normality assumptions for ϵ greatly de-emphasized.
- Use of transformations discouraged.
- A full chapter on measuring and interpreting factor effects.
- Debunks incorrect views of unbalanced classification problems.

The R Package regtools and the Mystery of P-Values

Norm Matloff University of California at Davis

Central Iowa R User Group

50% rough draft at

http://heather.cs.ucdavis.edu/draftregclass.pdf.

- Inference procedures based on normality assumptions for ϵ greatly de-emphasized.
- Use of transformations discouraged.
- A full chapter on measuring and interpreting factor effects.
- Debunks incorrect views of unbalanced classification problems.
- Interweaves nonparametric methods with linear and nonlinear parametric regression models.

Norm Matloff University of California at Davis

Central Iowa R User Group

The regtools Package

◆□▶ ◆□▶ ◆臣▶ ◆臣▶ 臣 のへぐ

The regtools Package

Norm Matloff University of California at Davis

Central Iowa R User Group

• Written for the book, but usable by all.

Norm Matloff University of California at Davis

Central Iowa R User Group

The regtools Package

▲ロト ▲帰ト ▲ヨト ▲ヨト 三日 - の々ぐ

- Written for the book, but usable by all.
- As with the book, interweaves nonparametric methods with linear and nonlinear parametric regression models.

Norm Matloff University of California at Davis

Central Iowa R User Group

The regtools Package

- Written for the book, but usable by all.
- As with the book, interweaves nonparametric methods with linear and nonlinear parametric regression models.
- Includes some unusual functions, both in the sense of new ways of doing old things, and ways of doing new things.

Norm Matloff University of California at Davis

Central Iowa R User Group

The regtools Package

- Written for the book, but usable by all.
- As with the book, interweaves nonparametric methods with linear and nonlinear parametric regression models.
- Includes some unusual functions, both in the sense of new ways of doing old things, and ways of doing new things.
- Work in progress, adding more functions over time.

Norm Matloff University of California at Davis

Central Iowa R User Group

Example: Multiclass Classification

◆□▶ ◆□▶ ◆臣▶ ◆臣▶ 臣 のへぐ

Norm Matloff University of California at Davis

Central Iowa R User Group

Example: Multiclass Classification

• One-vs.-All or All-vs.-All?

Norm Matloff University of California at Davis

Central Iowa R User Group

Example: Multiclass Classification

• One-vs.-All or All-vs.-All? Have code for both, argues (somewhat) in favor of OVA.

▲□▶ ▲□▶ ▲□▶ ▲□▶ □ のQ@

Norm Matloff University of California at Davis

Central Iowa R User Group

Example: Multiclass Classification

- One-vs.-All or All-vs.-All? Have code for both, argues (somewhat) in favor of OVA.
- Example: UCI vertebrae data. Logit model, 3 classes.

▲ロト ▲帰ト ▲ヨト ▲ヨト 三日 - の々ぐ

Norm Matloff University of California at Davis

Central Iowa R User Group

Example: Multiclass Classification

- One-vs.-All or All-vs.-All? Have code for both, argues (somewhat) in favor of OVA.
- Example: UCI vertebrae data. Logit model, 3 classes.
 - > trnidxs \leftarrow sample(1:310,225)
 - > predidxs \leftarrow setdiff(1:310,trnidxs)
 - > ovout \leftarrow ovalogtrn (3, vert [trnidxs,])
 - > predy \leftarrow ovalogpred (ovout , vert [predidxs , 1:6])
 - > mean(predy == vert[predidxs,7])
 - [1] 0.8823529
 - > avout \leftarrow avalogtrn(3,vert[trnidxs,])
 - > predy \leftarrow avalogpred (3, avout, vert [predidxs, 1:6])

▲ロト ▲帰ト ▲ヨト ▲ヨト 三日 - の々ぐ

- > mean(predy == vert[predidxs,7])
- [1] 0.8588235

Norm Matloff University of California at Davis

Central Iowa R User Group

Example: Multiclass Classification

- One-vs.-All or All-vs.-All? Have code for both, argues (somewhat) in favor of OVA.
- Example: UCI vertebrae data. Logit model, 3 classes.
 - > trnidxs \leftarrow sample(1:310,225)
 - > predidxs \leftarrow setdiff(1:310,trnidxs)
 - > ovout \leftarrow ovalogtrn (3, vert [trnidxs,])
 - > predy \leftarrow ovalogpred (ovout , vert [predidxs , 1:6])
